## EXPERIENCE

### Trans-System Inc., Cheney, WA — Junior .NET Developer

JUNE 2022 - PRESENT

I work as a full stack developer in a .NET backend and a Vue frontend. Responsibilities include meeting with stakeholders to understand user needs, implementing and designing full-stack solutions to address user requirements using C#, PowerShell, and TypeScript, refining work to suit our consumers, and communicating with many unrelated departments and individuals in the transportation industry to assist with current and future company-wide applications.

### Pizza Hut, Spokane, WA — Shift Lead

MAY 2021 - JULY 2022

Focused on leading a small team through daily operations. Responsibilities include customer service, task delegation, role filling, and decisive team-oriented action.

## EDUCATION

### Eastern Washington University, Cheney, WA — B.S. in Computer Science w/ Minor in Mathematics

SEPTEMBER 2018 - JUNE 2022

GPA: 3.1

Computer Science major focused on GPU computing, graphics rendering, and parallel computing with a minor in mathematics centered around discrete mathematics and structures.

## PROJECTS

### SpeedCommerce — Full-Stack (Rust/Qwik) WIP E-Commerce App

Small prototype monorepo-based e-commerce platform written using Mongo, Rust, and the bleeding-edge Qwik framework.

### ShopGen — Full-Stack (Vue/.NET) Shopping List Generation App

Small full-stack web application built for mobile viewing and used to optimize my own personal shopping and cooking routines. Allows a user to manage and share recipes, plan meals, and generate shopping lists.

### DataAdapterSharp — C# to SQL Server Database Connection Tool

Small library used to connect my C# backends to my own SQL Server instances in my other personal projects. Used to run stored procedures and hydrate their results into C# objects.

### ActionifySharp — C# Worker Service Library

Small library used to enable interval-based worker services in any dependency injection enabled environment. This can accomplish essentially any complex procedure on a set time interval as part of a larger dependency injected service.

## MY OBJECTIVE

Search for a role where I can continue to develop a robust and versatile skill-set across the full development stack while learning from and working closely with a team of new and experienced engineers alike.

## SKILLS

C#  
Azure DevOps  
PowerShell Scripting  
SQL Server  
Transact SQL  
CI/CD  
HTML & CSS  
JavaScript  
TypeScript  
Vue  
React  
Java  
C/C++  
CMake  
CUDA  
OpenGL  
Npm, yarn, pnpm  
Qwik (beta)  
Bun.sh (beta)

## VOLUNTEER WORK

### Spark Central (Spokane, WA)

NOV 2022 - Present

Volunteered as part of a program called "Kids Drop In and Code" helping remove financial and educational barriers for children interested in learning to code. My time at SparkCentral has been mostly using Scratch to help facilitate learning and usage of block code.
